

## Regular Hitting Drills

### Tee Work

#### Age Appropriate

Grouping 1, all ages

#### Objective

To develop proper weight shift; verbal cue: "You have to go back to go forward"

#### Setup

Batting tee, bucket of balls, net, screen, or fence to hit into

#### Execution

Players adjust the batting tee to a height that makes them swing down slightly to get the barrel of the bat to the ball. Players hit into the screen or a net with a target. Work strictly on weight shift ("Go back to go forward"). Take all the weight to the back side before exploding forward. Keep the head down and eyes on the ball. Take the front foot and front shoulder directly toward pitcher. Try to hit the ball at the target each time. Avoid an uppercut swing. If you don't have a net, plastic balls, tennis balls, or soft rubber balls can be hit into a fence. Never hit baseballs into a fence.

#### Coaching Keys

To help keep players from dropping the front shoulder, tell them to focus on hitting the ball into a target directly in front of the tee. If they're pulling the ball weakly, remind them to go straight back first before striding straight forward toward the pitcher ("Go straight back, then straight forward"). If they hit the tee, top ground balls, or swing and miss often, have them pick a spot on the ball and focus on that spot until they make contact.
