Mr. Patrick Wilson  
Senior Vice President  
Little League Baseball and Softball  
539 U.S. Highway 15  
P.O. Box 3485  
Williamsport, PA 17701-0485

Dear Mr. Wilson,

Due to the extreme mechanical changes that a batting helmet undergoes during the addition of a “c-flap” or other add-on face protector (removal of foam, drilling additional holes into the protective shell, adding hardware) and the uncontrolled means by which these face protectors are applied, CHAMPRO does not approve of the addition of a “c-flap” or other add-on face protector to its batting helmets that are SEI-certified to meet the NOCSAE standard. Any such addition of a face protector or other helmet add-on to our H4 SEI-certified batting helmet will void the certification of the helmet to the NOCSAE standard, along with our warranty.

The only add-on components that are currently approved for use with our H4 SEI-certified batting helmet are the H4FM face protector for baseball and the H4FMS face protector for softball, which are each models that are SEI-certified to meet the NOCSAE standard when paired with an H4 helmet of any size.

Sincerely,

Megan Hunt  
CHAMPRO Sports  
Product Safety & Compliance Manager
